## Section VII - Precautions for Safe Handling and Use

<u>Steps to Be Taken in Case Material is Released or Spilled:</u> Can be flushed down sewage or drainage systems with water. The product causes contaminants and other organic matter to accelerate biodegradation, thus returning to carbon dioxide and water. When disposed of in sewage and drainage systems, the product aids in safely breaking down pollutants already in the systems such as oil, fat and grease.
<u>Waste Disposal Method:</u> Can be flushed down sewage or drainage systems with water, in accordance with Local, State and Federal Regulations. Product is readily biodegradable (OECD 301B)
<u>Precautions to be taken in Handling and Storing:</u> Ship in containers that are either metal or plastic. Store below 45C as higher storage temperatures reduce the effectiveness of the product. Should not be stored close to caustics or strong bases.
